

A clear, impartial guide to
Home surveys

In association with

[rics.org/consumerguides](https://www.rics.org/consumerguides)

What you can expect from a survey

Surveys are a kind of 'health check' for buildings.

If you're buying a home you should have a survey done before you enter into a contract. In Scotland, you will have access to a Home Report which includes a single survey, valuation, EPC and property questionnaire. The Home Report is commissioned by the seller, but can be relied upon by the purchaser.

A survey can actually save you money. If there are problems, you can often re-negotiate the sale price of the home to reflect the cost of necessary repairs – or you may even decide you don't want to buy it at all.

If you're selling a home a survey can help you secure the agreed price and protect the sale. In Scotland, the law requires you to obtain a Home Report.

Your surveyor will report on all the parts of the home that can be easily reached and seen in accordance with terms of engagement agreed with you beforehand.

There are three levels of surveys undertaken by RICS members:

- **Level 1** – RICS Condition Report
- **Level 2** – RICS HomeBuyer Report
- **Level 3** – RICS Building Survey.

There are also other surveys available from RICS members too.

Talk them through with an RICS member – they'll be happy to discuss your particular concerns in more detail and help you decide which type of survey is right for you.

If you're interested in making structural changes to a home or you think there may be a damp or dry rot problem, an RICS member will be able to advise you about this too.

Their report is designed to help you make a more informed decision. Costs vary according to which type of survey you have, but all can offer reassurance.

Lender's valuation and Energy Performance Certificate

A lender's valuation is usually required when you are buying a home. It isn't a survey. It's a limited check on the home that your mortgage lender carries out to ensure it's worth the money they're lending you.

They'll probably ask you to pay for the valuation. Lenders may provide a copy of the mortgage valuation to the buyer but it is unlikely to cover items of detail which would be picked up in a survey.

There may be problems in the property that would cost a huge amount to put right – and they won't appear in the valuation report. This is why it's really important you have a survey. An RICS surveyor is fully qualified to carry out a survey, before you buy your home.

An Energy Performance Certificate (EPC) is not a survey but you may come across it as it has to be provided by law by a seller (or agent) when a home is marketed for sale. It is commissioned from an accredited Domestic Energy Assessor (DEA), who visits the property to collect the relevant data and creates the certificate. The DEA may be a member of RICS. For further information visit www.rics.org/epc

In Scotland, the EPC forms part of the Home Report and will be undertaken by the surveyor when the single survey and valuation are carried out.

RICS Home surveys

There are effectively three different types of survey to choose from as defined by RICS Home Surveys. For further information visit www.rics.org/homesurveys. These can only be carried out by qualified surveyors licensed to do so. Reliable and cost effective, these reports carry the full weight of RICS – the industry’s most respected authority on surveying. Some chartered surveyors offer their own-format home survey services. Whilst you are free to choose you are advised to see how others compare to the standard RICS Home Surveys services as described on pages 8 to 11. For instance some own-format reports may not include ‘traffic-light ratings as part of the service.

Buying a home

It’s important to remember that your mortgage lender’s valuation report is not a survey. It merely tells your lender whether or not the property is reasonable security for your loan.

A home survey will tell you the actual condition of the property. That’s vital information that can be invaluable during price negotiations, and will also help you avoid expensive surprises after you’ve moved in.

Selling a home

A home survey can help you prepare for selling your property. It will show you any problems that may delay your sale or cause price reductions later in the process.

Staying at home

A home survey of the current condition of your home will warn you of defects and help you avoid escalating repair and maintenance costs in the future. It will also be extremely useful if you’re thinking of remortgaging.

RICS members offer other survey services too eg. specific defect reports.

RICS Condition Report (Survey level one)

Choose this report if you’re buying, selling or living in a conventional house, flat or bungalow built from common building materials and in good condition. It focuses purely on the condition of the property by setting out the following:

- clear ‘traffic light’ ratings of the condition of different parts of the building, services, garage and outbuildings, showing problems that require varying degrees of attention
- a summary of the risks to the condition of the building; and other matters including guarantees, planning and building control issues for your legal advisers.

An RICS Condition Report does not include a valuation, but your surveyor may be able to provide this as a separate extra service.

Ask your surveyor for a detailed Description of the RICS Condition Report Service leaflet or visit www.rics.org/homesurveys

RICS HomeBuyer Report [Survey level two]

Choose this report if you would like more extensive information whilst buying or selling a conventional house, flat or bungalow, built from common building materials and in reasonable condition. It costs more than the Condition Report but includes:

- all of the features in the Condition Report plus a more extensive inspection
- the surveyor's professional opinion on the 'Market Value' of the property
- an insurance reinstatement figure for the property
- a list of problems that the surveyor considers may affect the value of the property
- advice on repairs and ongoing maintenance
- issues that need to be investigated to prevent serious damage or dangerous conditions
- legal issues that need to be addressed before completing your conveyancing and
- information on location, local environment and the recorded energy efficiency (where available).

Ask your surveyor for a detailed Description of the RICS HomeBuyer service leaflet or visit www.rics.org/homesurveys

Home Report [Scotland]

The Home Report is a pack which contains information about a property which is on the market for sale in Scotland. The Home Report is required by law for homes in Scotland marketed for sale from 1 December 2008.

The Home report has 3 parts:

1. Single Survey and Valuation: This gives information on the condition of the property and how urgently it needs to be prepared. It also states the current market value and accessibility for disabled access.
2. An Energy Report and EPC.
3. A Property Questionnaire: Contains information on the council tax banding, parking arrangements, electricity supplier as well as other general information.

RICS Building Survey [Survey level three]

You should choose an RICS Building Survey if you're dealing with a large, older or run-down property, a building that is unusual or altered, or if you're planning major works. It costs more than the other RICS reports because it gives detailed information about the structure and fabric of the property.

It includes:

- a thorough inspection and detailed report on a wider range of issues
- a description of visible defects and potential problems caused by hidden flaws
- an outline of repair options and the likely consequences of inactivity and
- advice for your legal advisers and details of serious risks and dangerous conditions.

An RICS Building Survey does not include a valuation, but your surveyor may be able to provide this as a separate extra service. Estimated costs of repairs may also be included as an option.

For further information ask your surveyor or visit www.rics.org/homesurveys

Easy reference chart

This table will help you choose the most appropriate survey, but if you have any particular requirements, remember to discuss them with your surveyor before the inspection of the property. The surveyor may be able to provide you with extra services, under separate contracts.

Service features	Level 1 RICS Condition Report Service	Level 2 RICS HomeBuyer Service	Level 3 RICS Building Survey
Describes the construction and condition of the property on the date of the inspection	✓	✓	✓
Aims to identify and problems that need urgent attention or are serious	✓	✓	✓
Aims to identify things that need to be investigated further to prevent serious damage	✓	✓	✓
Aims to tell you about problems that may be dangerous	✓	✓	✓
Aims to show up potential issues and defects, before any transaction takes place	✓	✓	✓
Includes the standard visual inspection during which secured panels, electrical fittings, inspection chamber covers and other similar features are not removed	✓	✓	✓
Aims to help you decide whether you need extra advice before committing to purchase		✓	✓
Aims to enable you to budget for any repairs or restoration		✓	✓
Aims to advise you on the amount of ongoing maintenance required in the future		✓	✓
An enhanced service that includes all the features of the standard inspection plus a more extensive roof space and underground drainage inspection		✓	✓
Provides a reinstatement cost to help you avoid under- or over-insurance		✓	
Provides market valuation		✓	
Aims to establish how the property is built, what materials are used and how these will perform in the future			✓
Aims to describe visible defects, plus exposing potential problems posed by hidden defects			✓
Aims to outline the repair options and give you a repair timeline, whilst explaining the consequences of not acting			✓
A longer and more detailed visual inspection of a wider range of issues including a more thorough consideration of the roof space, grounds, floors and services			✓

Confidence through professional standards

RICS promotes and enforces the highest professional qualifications and standards in the development and management of land, real estate, construction and infrastructure. Our name promises the consistent delivery of standards – bringing confidence to the markets we serve.

We accredit 118,000 professionals and any individual or firm registered with RICS is subject to our quality assurance. Their expertise covers property, asset valuation and real estate management; the costing and leadership of construction projects; the development of infrastructure; and the management of natural resources, such as mining, farms and woodland. From environmental assessments and building controls to negotiating land rights in an emerging economy; if our members are involved the same professional standards and ethics apply.

We believe that standards underpin effective markets. With up to seventy per cent of the world's wealth bound up in land and real estate, our sector is vital to economic development, helping to support stable, sustainable investment and growth around the globe.

With offices covering the major political and financial centres of the world, our market presence means we are ideally placed to influence policy and embed professional standards. We work at a cross-governmental level, delivering international standards that will support a safe and vibrant marketplace in land, real estate, construction and infrastructure, for the benefit of all.

We are proud of our reputation and we guard it fiercely, so clients who work with an RICS professional can have confidence in the quality and ethics of the services they receive.
